

NAPA AUTO CARE

All tools needed to implement an apprenticeship program of your own!

Finding, hiring and retaining technicians are some of the industry's biggest pain points. The NAPA Auto Care Apprenticeship Program is designed to give your shop the tools necessary to train your technicians to combat this issue. This program is a FREE included benefit. Participating shops can purchase an optional and discounted tool kit to help their apprentice start their career on the right foot with the tools for success!

HOW IT WORKS

The Apprenticeship Program curriculum is competency based. Meaning an apprentice can move through each stage at a pace that best suits them. ASE G1, A4, A5, and A/C certifications will be earned throughout the program, adding industry validation to the skills an apprentice acquires.

9 Stages

Paid while you learn.

9 stage curriculum designed to give an apprentice a broad and deep understanding of the various components systems found in modern day vehicles.

2 Year Program

Go at your own pace.

The Apprenticeship Program curriculum is competency based. Meaning an apprentice can move through each stage at a pace that best suits them.

4 ASE Certifications

Earned throughout.

ASE G1, A4, A5, and A/C certifications will be earned throughout the program. Adding industry validation to the skills an apprentice acquires.

APPRENTICE TOOL KIT

One of the largest entry barriers for individuals looking to enter the automotive industry is the cost of tools. NAPA Auto Care designed this set to provide professional quality tools that are essential for the technician's career.

APPRENTICE PROGRAM

Types of Training

The NAPA Auto Care Apprenticeship program includes a comprehensive curriculum that includes a variety of training types.

- **Classroom Training Videos:** Exclusive to the Apprenticeship Program these videos provide an in-depth training from a successful Master Technician.
- **Autotech Classes:** Instructor led courses offered through NAPA Autotech.
- **Autotech eLearning:** Web based eLearnings designed to target specific training topics.
- **Hands On Learning:** The apprentice will apply the skills gained from the classroom training videos, Autotech instructor-led training, and Autotech eLearnings in the shop with the guidance of a mentor.

Auto Care centers that sign up will receive an Apprenticeship Program Handbook

- 22 page walk through of each step to get started on the program
- Instructions on how to use and navigate the Auto Care Training Portal
